

## TOTAL

MOBILE DEVICE MANAGEMENT

### Today's "bring your own device" and "bring your own app" environments result in key challenges for IT organizations:

- Cost of additional support for the IT department
- Data loss potential due to numerous unsecure endpoints
- Rapid cost overruns caused by roaming data plans
- Productivity loss with unsecured apps and unfiltered web browsing

Some organizations ask why they need a mobile device management (MDM) solution. The answer is: **savings** and **protection**.

Today's MDM solutions are too complex for most organizations; as a result, they are also very expensive for the benefits required.

Contact ContentWatch today to learn more.

or scan this QR code with your mobile device.

With ContentProtect MDM, you get security, protection, and filtering for **20% - 50% less than other MDM solutions**.

### Key Features:

- **100% Cloud-Based management:** no on-site servers or hardware required.
- **Android and iOS:** both types of devices are managed from the same admin console
- **Content Filtering and Internet Controls:** full management of access to web content by user, device or group with detailed reporting.
- **App inventory and management:** able to deploy, install, block, or un-install apps remotely.
- **Low Cost:** no data hosting fees, no set-up costs, and no minimum purchases.
- **One-click device enrollment** via SMS, e-mail, custom URL or QR code.
- **Simplified control of settings and group policies:** manage Wi-Fi networks, mobile apps, and PINs.
- **Device Lock:** in the event of device loss or theft, render the device unusable by others.
- **Device Locate:** GPS-based tracking of lost or stolen devices.
- **Device management:** Get device information such as OS version, hardware info, phone number and registered email accounts. Also manage access to mobile device features such as camera and hardware settings.
